

Welcome to Pioneer House

Pioneer House is a community owned and operated aged care facility for those who require specialised aged care or who have high care needs.

Located in Mudgee, we are a pleasant three and a half hour drive from Sydney and the Central Coast. Our facility truly reflects the gentle, quiet feel of rural living and the caring nature of country people. Our motto is "Community Caring for our Aged".

Pioneer House staff are highly qualified and continue to receive extensive education on multiple aspects of behaviour management.

Pioneer House recently underwent a major extension and refurbishment to increase our residential area to 80 beds.

The development included:

- Low care general wing
- Low care dementia specific wing
- High care dementia specific wing
- High care general wing
- High and low care respite
- Secure gardens.

We invite you to visit us for a tour of our facilities. Please contact us for an appointment.

Community Caring for our Aged

*Continued Leadership
in the Provision of
Aged Care.*

Our Facilities

Pioneer House is a real "home away from home", offering both high and low care accommodation and specialising in Dementia care.

We treat all our residents as individuals and encourage you to become part of our extended family.

Our modern facilities offer comfortable single or double rooms with ensuites, open communal areas and outdoor gardens to enjoy the sun and fresh air.

Our Philosophy

Assisting individuals to maintain their abilities, skills and physical independence is central to our philosophy. All residents are individually assessed by our staff in consultation with the resident and/or their representative.

Programs are based on individual and group needs and are multi-layered to include music, craft and relaxation.

Our palliative care approach aims to improve the quality of life for individuals with a life-limiting illness.

Underlying our philosophy is a positive and open attitude toward death and dying during all stages of an illness. We focus on active comfort care through a thorough pain assessment and a positive approach toward reducing symptoms and distress.

Family are important to us, so we offer a support system to help them cope during the resident's illness and in their own bereavement.
